

CBD OIL

Benefits: anti-inflammatory, may provide great pain relief, all natural, completely legal in USA

How do I buy it?

Please go to our website @ <https://www.blueridgechronicpaincenter.com>
Under the Treatment heading click on CBD Oil.
Click on Shop now

Scroll down until you get to the 350 mg tincture bottle. Click BUY NOW
ADD TO CART

At checkout enter DRLEE10 in the coupon code box and apply code for the 10% discount.

How much of it do I take?

one dropperful under the tongue in the morning and at night, if you don't see any results in 7 days, double the dose.

My advice is to try a bottle and see if this is a viable pain treatment option for you.

Blessings,

Dr. Lee

Information on CBD oil:

<https://www.health.harvard.edu/blog/cannabidiol-cbd-what-we-know-and-what-we-dont-2018082414476>

CBD stands for cannabidiol. It is the second most prevalent of the active ingredients of cannabis (marijuana). While CBD is an essential component of medical marijuana, it is derived directly from the hemp plant, which is a cousin of the marijuana plant. While CBD is a component of marijuana (one of hundreds), by itself it does not cause a "high." According to a report from the [World Health Organization](#), "In humans, CBD exhibits no effects indicative of any abuse or dependence potential.... To date, there is no evidence of public health related problems associated with the use of pure CBD."

CBD may offer an option for treating different types of chronic pain. A study from the *European Journal of Pain* showed, using an animal model, CBD applied on the skin could help lower pain and inflammation due to arthritis. Another study demonstrated the mechanism by which CBD inhibits inflammatory and neuropathic pain, two of the most difficult types of chronic pain to treat. More study in humans is needed in this area to substantiate the claims of CBD proponents about pain control.
